CUSTOMERS BOOKING CONFIRMATION

Customers Contact us page

Customer contact us page with constraint.

A screenshot of a web browser displaying a contact form titled "Contactus.html". The form is set against a dark background. It includes fields for Name (split into first and last name), E-mail, Date of Birth, a "Choose from" dropdown for country, a "Your message" text area, and a "The reason for your message" text area. A "Submit" button is at the bottom. A white error message box is open, stating "This page says" and "** Please fill the Name field". The "Name" field is highlighted with a red border. Below the form, there are two horizontal images of a car's interior, showing the steering wheel and dashboard. The browser's taskbar at the bottom shows the time as 2:33 AM.

Name: LastName:

E-mail:

Date of Birth:

Choose from:

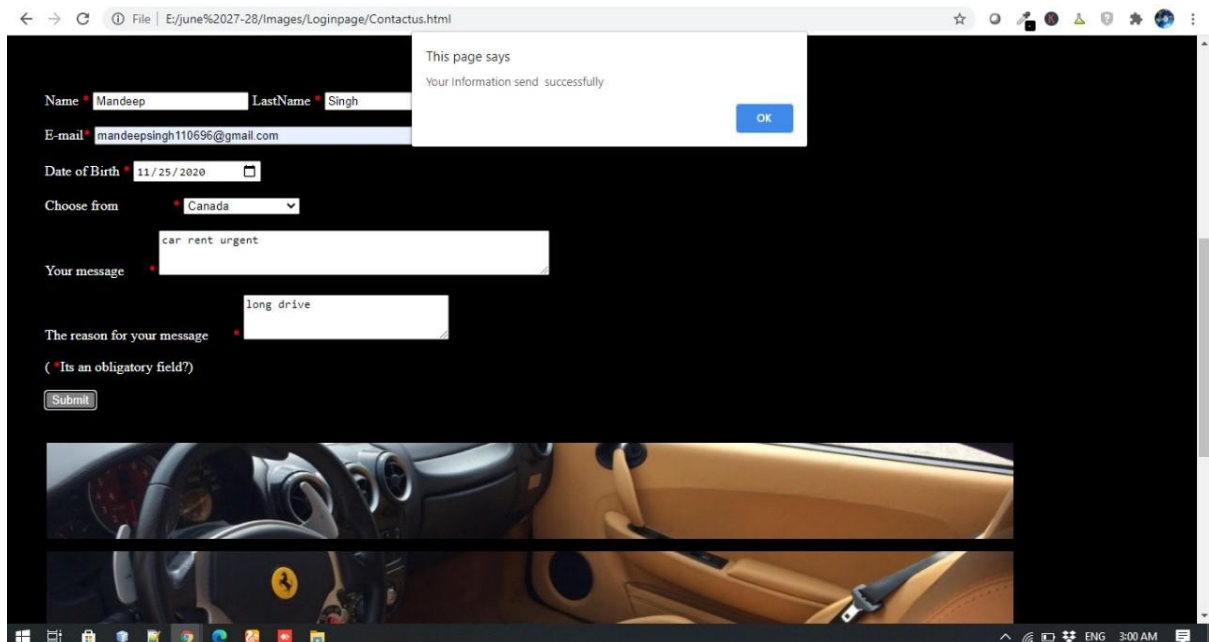

Your message:

The reason for your message:

(* Its an obligatory field?)

This page says
** Please fill the Name field

CUSTOMERS CONTACT DETAILS SEND SUCCESSFULLY.

A screenshot of the same contact form after successful submission. The form fields are now populated: Name (Mandeep Singh), E-mail (mandeepsingh110696@gmail.com), Date of Birth (11/25/2020), Choose from (Canada), Your message (car rent urgent), and The reason for your message (long drive). A white success message box is open, stating "This page says" and "Your information send successfully". The "Submit" button is now disabled. The car interior images remain at the bottom. The browser's taskbar at the bottom shows the time as 3:00 AM.

Name: LastName:

OBSTACLES FACED IN THIS SPRINT.

OBSTACLE FACED IN DESIGNING: While designing the product details page we were facing the problem to achieve that pattern of the webpage we have done a lot of work behind that design. To overcome that obstacle we have used webkit-clip-path with respect to polygon.

OBSTACLES FACED IN JAVASCRIPT: To pass the data between the pages while developing the booking pages then we used local storage to get rid of it.

OBSTACLES IN FIREBASE: when we were calling the method that was implementing firebase and just after that we have to redirect the page but the problem was page redirecting before the firebase inserting the data. We resolve that issue by using the callback function which will tell us when the firebase has completed its operations.

TASK DISTRIBUTION

NAME	TASK	DAYS
Harsh Patel	Designed booking and confirmation page	Monday and Tuesday.
Mandeep Singh	JavaScript and Firebase	Wednesday, Thursday and Friday
Gagandeep	Product details and product page	Tuesday and Wednesday
Amritpal Singh	Home page and contact us	Wednesday and Thursday
