# Sprint 2

SCRUM REPORT

**CUSTOMER REGISTRATION PAGE**

CUSTOMER REGISTERATION PAGE WITH CONSTRAINTS.

- **We have implemented all the validation with respect to the fields.**
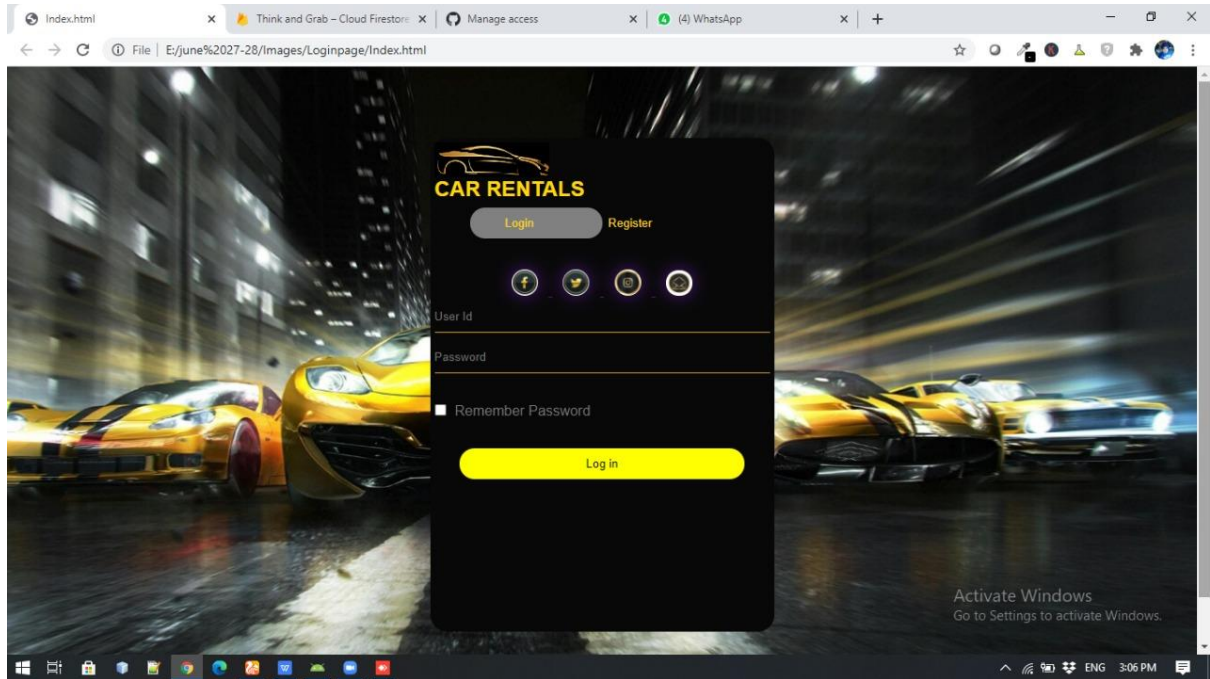

SUCCESSFULLY CUSTOMER REGISTRATION PAGE

- **If the user enters all details appropriately and then user will be registered successfully.**

CUSTOMER LOGIN PAGE

**CUSTOMER LOGIN PAGE WITH CONSTRAINTS**

- **We have implemented all constraints according to the respective fields.**

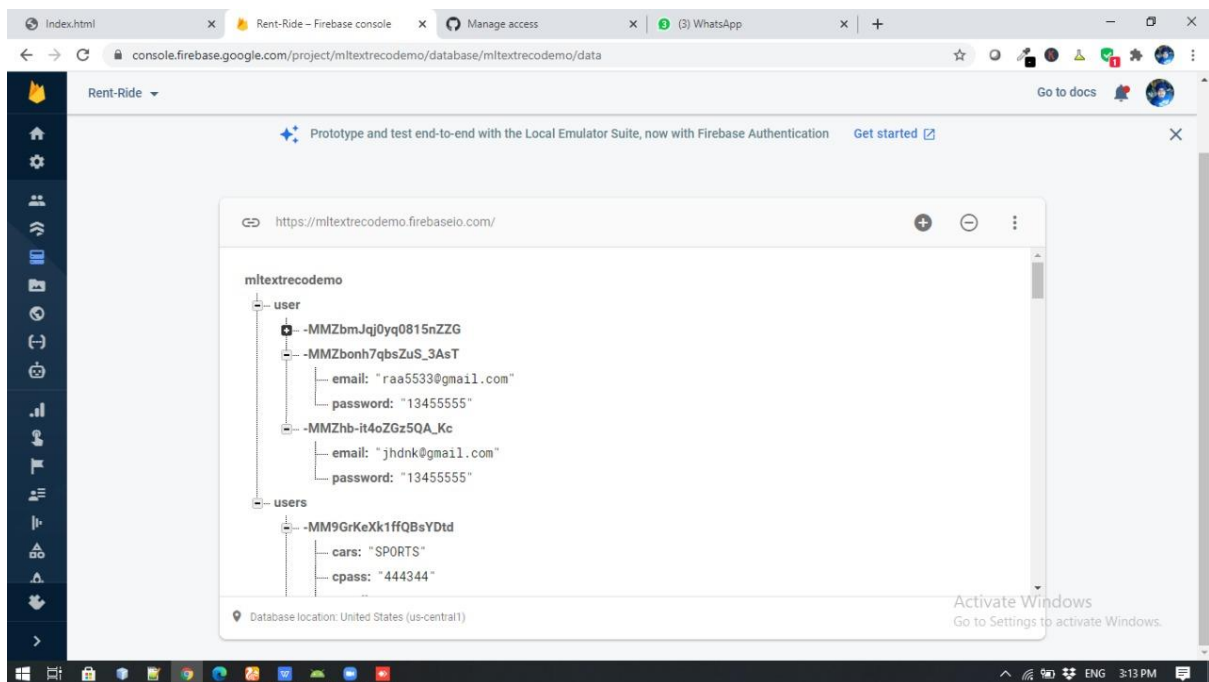

SUCCESSFUL CUSTOMER LOGIN PAGE

- **If user enters valid login credentials user will able to login successfully.**

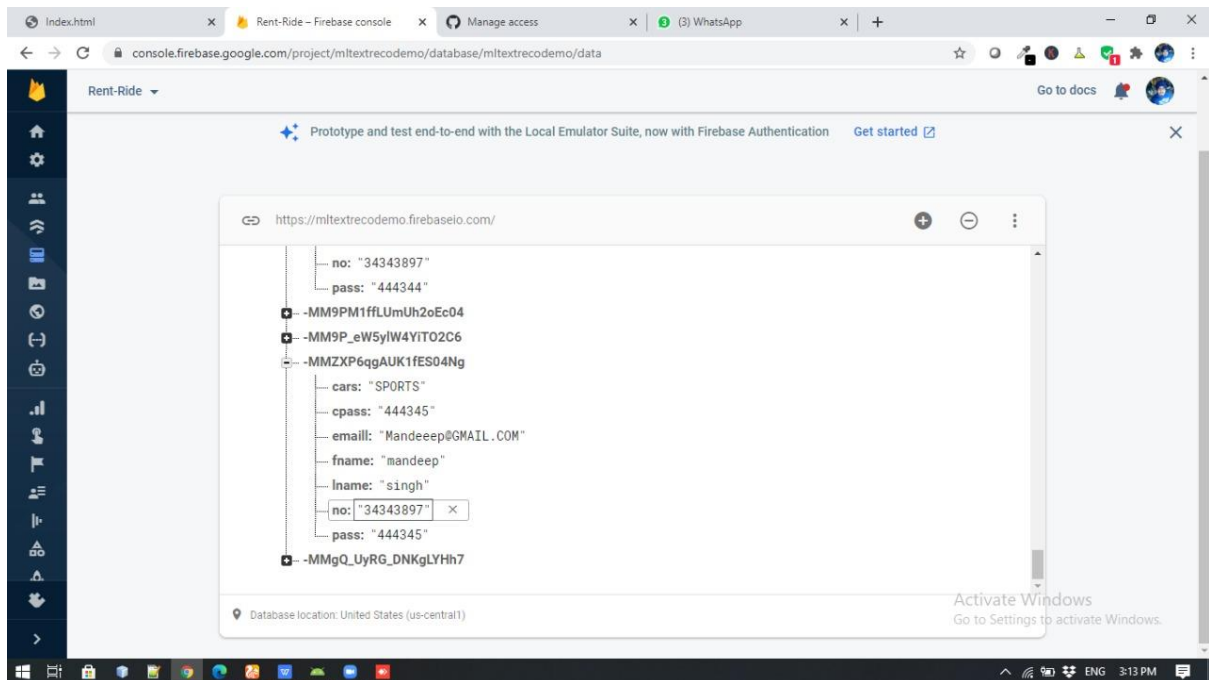

**LIST OF USER EMAIL'S WITH THE HELP OF FIREBASE AUTHENTICATION .**

USERS LOGIN INFORMATION USING REAL TIME DATABASE.

ALL THE USERS INFORMATION WITH RESPECT TO USERS REGISTRATION.

CODE COMMITED IN GIT HUB

OBSTACLES FACED IN THIS SPRINT.

OBSTACLE FACED IN DESIGNING: Our goal was combine login functionality and registration functionality in one webpage so, it was new for us to do that which took a lot of efforts and research.

OBSTACLES FACED IN JAVASCRIPT: Our main obstacle which we have encounter in this phase that when we try to submit the form we are using input type = submit and we were using onsubmit method the problem with this method is that it automatically reload the page and it is not calling our validation method hence it keeps submitting the data without checking the validation. To resolve this problem we used onclick method.

OBSTACLES IN FIREBASE: For registration we are using createUserWithEmailAndPassword that was working fine for registration but for login we were using the same method which was not working appropriately so then we used signInWithEmailAndPassword it was working fine. The problem with this createUserWithEmailAndPassword method it was allowing any user to login regardless if the user is registered or not.

TASK DISTRIBUTION

NAME	TASK	DAYS
Harsh Patel	Designed the login and registration page.	Monday and Tuesday.
Mandeep Singh	JavaScript and Firebase	Wednesday, Thursday and Friday
Gagandeep	Documentation	Saturday
Amritpal Singh	Git Hub commits	Saturday
